

Electro-Mechanical Powertrain Engineer

Job Title	Electromechanical PW Engg	Location	Greater Noida
Department/Group	Technical	Position Type	Full Time
Job Description			
Role Overview We are looking for a highly motivated Electro-Mechanical Powertrain Engineer to design, develop, and integrate electric powertrain systems for light electric vehicles (L3/L5 category). This role sits at the intersection of mechanical design, electrical systems, and vehicle integration , and requires strong hands-on capability along with analytical thinking.			
VoltWorks VoltWorks Technologies Private Limited is a dynamic company at the forefront of the Indian electric vehicle industry. Founded by talented alumni from prestigious institutions like IIT Delhi and IIT BHU, we are driven by innovation and collaboration. With our German and South African teams, we are constantly solving challenges and pushing the boundaries of motor and controller development. If you're ready to be part of our exciting journey, we invite you to come aboard!			
Key Responsibilities • Design and develop electric powertrain systems including motors, controllers, transmissions, and related assemblies • Work on 3D CAD modeling and detailed engineering drawings for powertrain components and assemblies • Ensure seamless integration of motor, controller, and battery systems into vehicle architecture • Analyze and optimize thermal performance, efficiency, and reliability of the powertrain • Collaborate with cross-functional teams (vehicle design, electronics, procurement, manufacturing) • Support prototype development, testing, validation, and troubleshooting • Work with suppliers for component selection, validation, and cost optimization • Develop and maintain technical documentation, BOMs, and design standards • Drive improvements in performance, durability, and manufacturability			
Required Skills & Qualifications • Bachelor's or master's degree in mechanical engineering / electrical engineering / Mechatronics • Strong understanding of: ○ Electric motors (BLDC/PMSM) and their working principles ○ Motor controllers and control strategies ○ Basics of battery systems and EV architecture			

VoltWorks Technologies Private Limited

Plot - 63, Udyog Vihar Extension, Ecotech - II, Greater Noida, UP – 201306

GSTIN: 09AAJCV3018R1ZN

VOLTWORKS
CONNECTED MOBILITY

- Proficiency in **CAD tools** (SolidWorks / CATIA / Creo or equivalent)
- Understanding of:
 - **Electro-mechanical system integration**
 - **Vehicle packaging and layout constraints**
 - **Thermal management concepts**
- Hands-on experience with **prototyping and testing**
- Ability to read and interpret **electrical schematics and mechanical drawings**

Preferred Qualifications

- Experience in **electric vehicles (2W/3W/4W) or mobility startups**
- Exposure to **simulation tools** (ANSYS, MATLAB/Simulink, etc.)
- Understanding of **CAN communication and vehicle electronics**
- Experience working with **suppliers or contract manufacturers**
- Knowledge of **DFMEA, DFM, and reliability engineering**

What You'll Work On

- Next-generation **electric powertrains for e-rickshaws and light EVs**
- Improving **efficiency, cost, and durability** of existing systems
- Building **scalable and manufacturable solutions**
